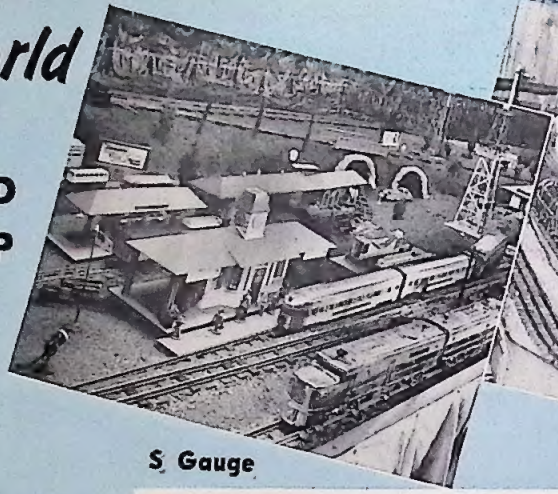
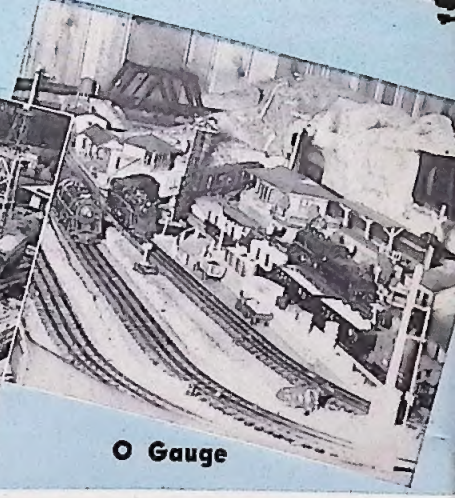
HO Gauge



S Gauge



O Gauge

Imagine all the happy hours you and your boy would spend together if you built him a layout like one of those pictured here.

The amazing thing about these spectacular railroad systems is that they look bigger than they really are and cost considerably less than you would think. Actually all were built by average men living under average conditions.

Space is the first consideration. To get the most out of your trains, they should be set up permanently on a bench or table where you can work on and enjoy them the year 'round. And that can be readily done by choosing a gauge that will allow interesting track work and ample scenery in the space you have available. For even if you live in a small house or apartment, you can have an eye-filling layout like the one pictured by selecting HO. This beautiful little railroad measuring only 3' x 4' can be placed on a card table when in use and stowed in a closet or under the bed between times.

The rest is easy. Like Rome, model railroads are not built in a day. Start modestly with a simple train set, several inexpensive structures, some figures and autos. Then next year expand your trackage, add switches and crossings, more buildings and people.

The scenic effects are pretty much a do-it-yourself project. Hills and valleys are easy and fascinating to build. And the cost of materials is quite low.

So what's to stop you, too, from having the railroad of your dreams? Remember, model railroading is our business and we're here to help you in every way possible.

*O27 is actually not a gauge but a track diameter. Track is lower and curves are sharper than Lionel O. Locos for O27 are smaller because of curve radius.

HOW TO CHOOSE TRAINS BEST SUITED FOR YOU

Trains, like automobiles, TV sets and many things you buy, are designed to please a variety of tastes. You can indulge your fancy for elaborate trackage, remote control operation, scale model realism or fabulous automatic accessories. No one set or make of trains will give you everything. Therefore, it is important to carefully check the merits of all the lines and then buy the one that provides the most features you want.

**The chart at left summarizes the facts of each of the four major American-made lines of trains.*

HOW SCALE AFFECTS OPERATING "MILEAGE"

Here's the running distance you get out of a 4' x 8' oval in each of the three gauges. Train shown for each gauge is a typical 4-car freight consisting of locomotive, three freight cars and caboose.

O Gauge — 1028 scale feet; Train occupies 22% of trackage

S Gauge — 1334 scale feet; Train occupies 17½% of trackage

HO Gauge — 1946 feet—more than 1/3 scale mile

LIONEL

All the vibrant COLOR and flashing action of real railroading . . . that's literally true of LIONEL TRAINS! Look at the new, long, scale-modelled LIONEL box cars . . . what a choice of brilliant colors and authentic famous R.R. heralds! Look at LIONEL locos . . . great streamliners, steam turbines, the new Fairbanks-Morse Diesel, the Seaboard switcher. The whole array is colorful as only the real thing can be!

LIONEL TRAINS* with MAGNE-TRACTION*

For More Speed . . . More Pull . . . More Climb

LIONEL's exclusive Magne-Traction is a permanent track-gripping power that makes possible action never before equalled. Watch your trains climb steep grades, take curves at headlong speed. Watch 'em stop "on a dime." And then get up close and see how LIONEL carries realism into every small detail . . . from true-to-life steam whistles and Diesel horns to solid steel wheels and heavy-duty trucks. All LIONEL TRAINS have real R.R. remote-control Knuckle Couplers. All LIONEL rolling stock is detailed to blueprint perfection. And with famous LIONEL ACCESSORIES you complete the picture of a big-time railroad in full operation!

All prices, structural or mechanical designs and colors in this catalog are subject to change without notice.

Important! Lionel Trains and Accessories are sold only through Lionel dealers.

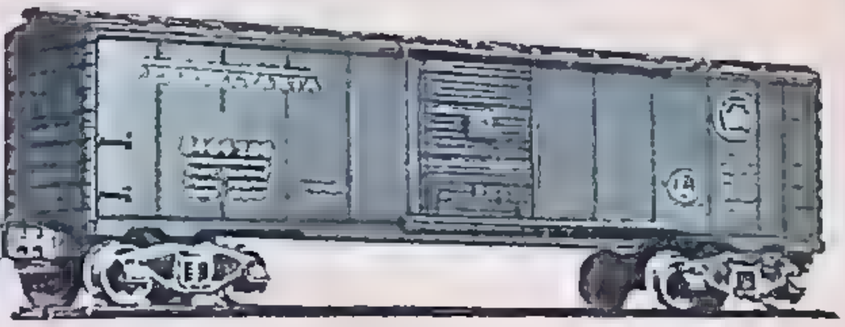
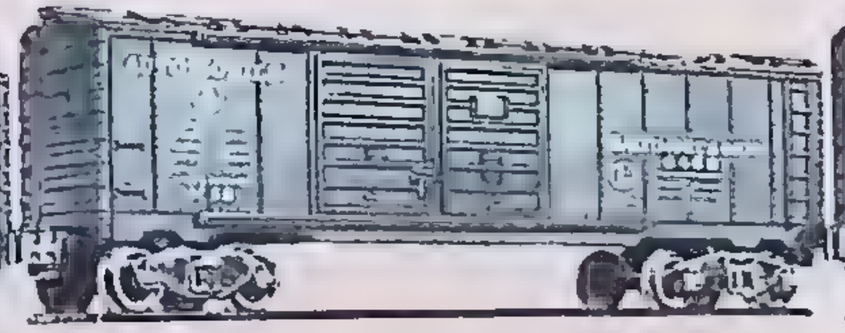
No. 6511 LIONEL PIPE CAR **$5.95**
A wonderful car for any load you want to haul. Simulated pipes are removable. Side stakes can be removed so that you can carry wide loads. This type of flat car is used for many types of freight. Length 10½".

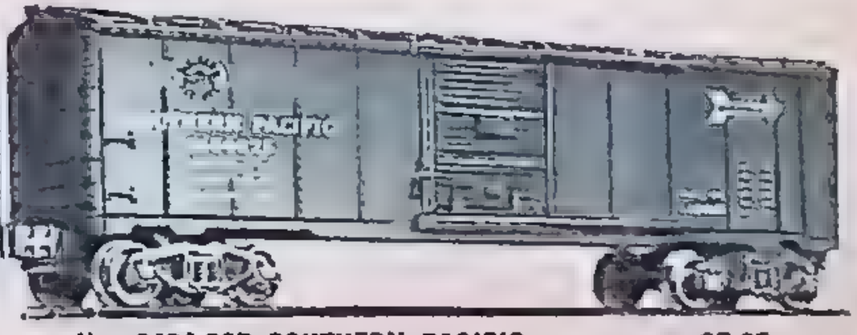


No. 6464-200 PENNSYLVANIA R.R. **$5.50**
Regardless of the name of your pike, this car will fit into the pattern, for the Pennsylvania R.R. cars can be seen on the rails in every part of the nation. They carry freight long and far. No. 6464-200 is 10½" long.

No. 6464-100 W. P. FEATHER CAR. **$5.50**
The Western Pacific is proud of the "feather in its cap," and this car shows its emblem on the side. Designed for handling of fast freight loads, the W.P. "feather car" handles delicate merchandise. Overall length is 10½".

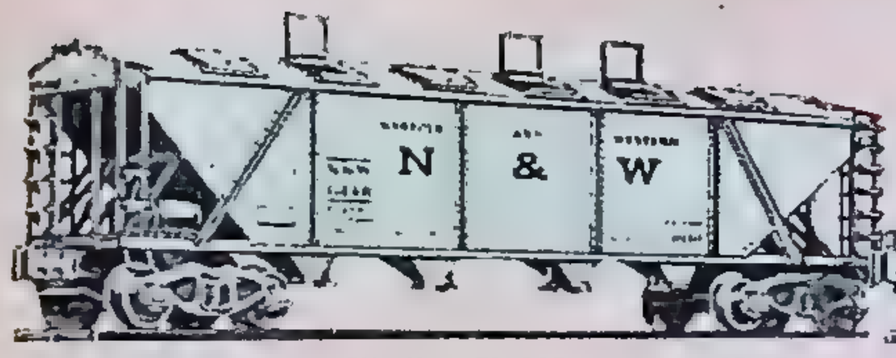


No. 6468 B & O AUTOMOBILE CAR **$5.50**
This blue Baltimore & Ohio automobile car is a type that has become increasingly helpful in freight hauling. Large doors permit handling of many loads other than automobiles. Used for furniture hauling. Length 10½".



No. 6464-225 SOUTHERN PACIFIC **$5.95**
One of the most unusual box cars to ride the high iron! It is completely black with gold herald and white lettering. The type of cargo it carries is explained by the insignia "Overnight." A beautiful car, 10½" long.

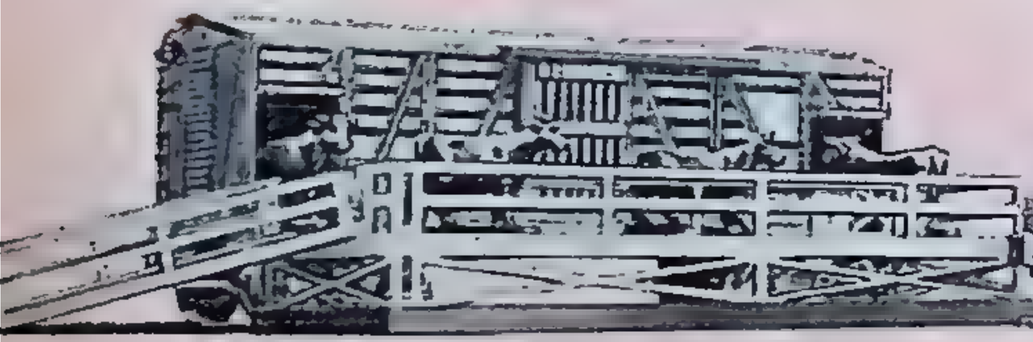
There's fun with LIONEL Operating Cars



No. 6446 NEW CEMENT HOPPER CAR **$5.95**
A new scale-modelled covered hopper that measures 11½" long. A wonderfully accurate reproduction. It has four simulated double hoppers underneath. Eight of the top hatches can be operated manually.

No. 3620 SEARCHLIGHT CAR **$7.95**
Finely detailed well-car carries GM-type generator and big light which rotates continuously. It does not require a remote control track section, as it picks up current from the tracks. Measures 10" long.

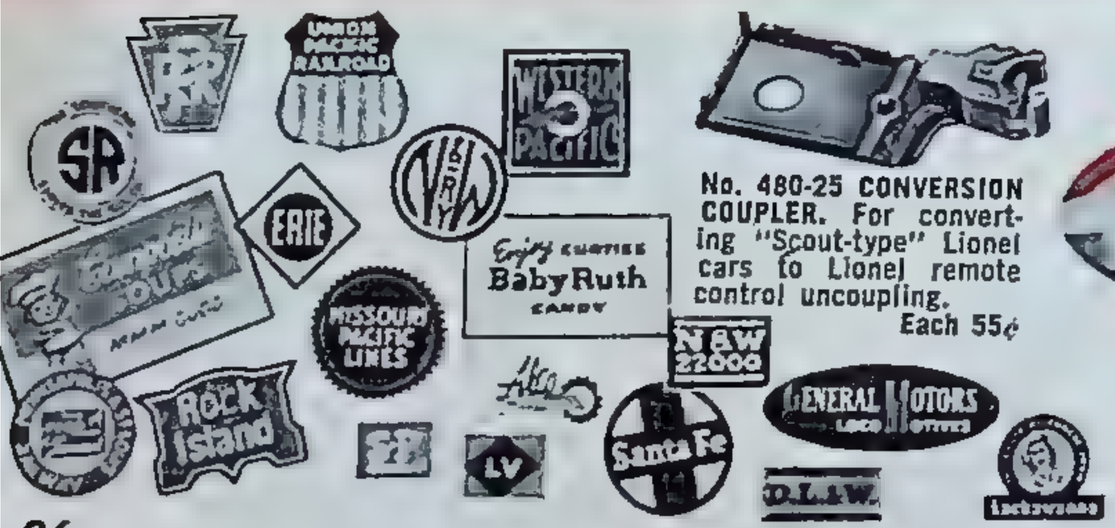
No. 6417 PENN R. R. N5C CABOOSE **$5.75**
This caboose is copied from the N5C class "cabin car" currently being used on the Pennsylvania Railroad. Note the streamlined roof, turret-type cupola, detail of ladders and cat walks. Car is 7⅛" long.



No. 3656 OPERATING CATTLE CAR **$15.95**
Nothing like it for action! Push a remote control button and cattle "walk" out of the car, through the runways and back into the car again. Remote control track section not required. 9¼" long.

No. 3469 OPERATING DUMP CAR **$8.50**
Just the thing for handling loads of coal, crushed rock, ore. Remote control tilts car bed and empties load into bin at railside. This car will handle many cargoes for you. Length 9½".

No. 3461 OPERATING LUMBER CAR **$7.25**
You can roll the logs off this car by pressure of a button. As car bed tilts, stakes swing down to permit logs to roll into bin. Fine Lionel detail. An excellent companion for No. 364 Conveyor. 9½" long.



No. 480-25 CONVERSION COUPLER. For converting "Scout-type" Lionel cars to Lionel remote control uncoupling.
Each 55¢

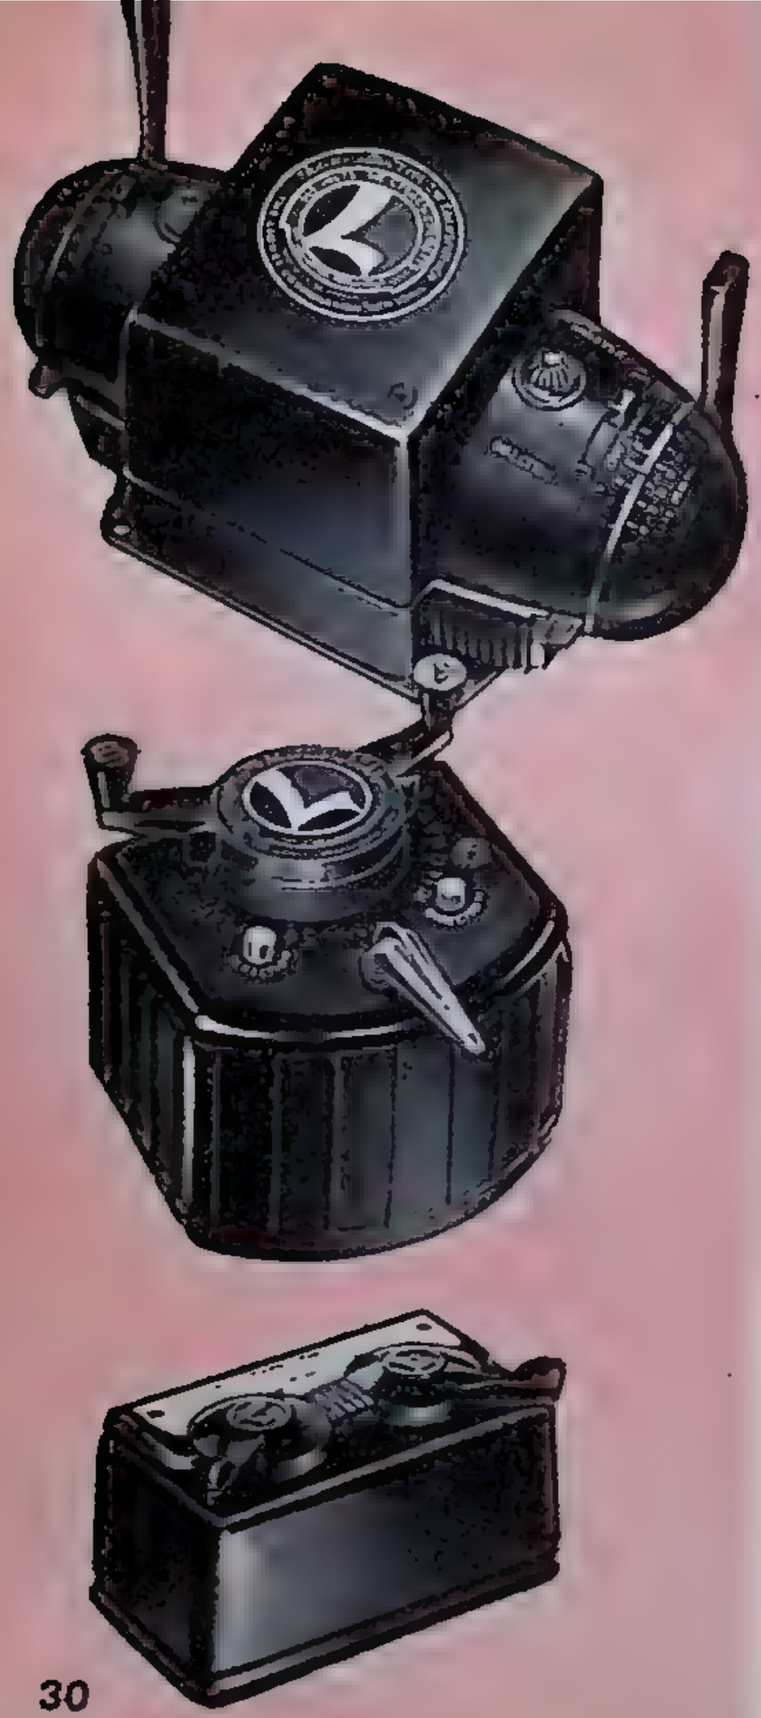
LIONEL *Trainmaster* TRANSFORMERS

Your transformer is the very heart of your model railroad system. Choose it well. The performance of your train and accessories depends upon its efficiency.

Lionel "Trainmasters" are recognized as the world's finest. They have been designed and constructed by experts whose years of experience have taught them how to build for performance and endurance.



**TYPE ZW 275 WATT,
115 VOLTS, A.C., 60 CYCLES**

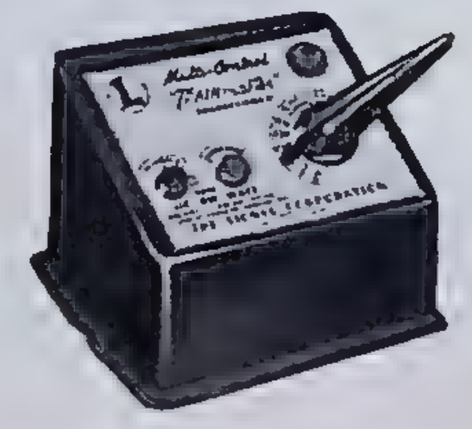
Will handle as many as four trains on your big layout at the same time. Engineer-type throttles push forward to increase speed, pull back to slow or stop train. Inner levers control whistles and forward-reverse movement of train. This transformer has four independently controlled voltage circuits, two of them with whistle and train controls. Accessory voltages are controlled by dials on dome ends. Heavy duty circuit breaker protects against "shorts." Red warning light indicates "shorts." Green light shows "power on." **$29.95**

**TYPE KW 190 WATT,
115 VOLTS, A.C., 60 CYCLES**

Operates two trains plus accessories! Train control throttle is designed after the type used in Diesel and electric locomotives. Lever at front center blows train whistles — moves left for one, right for the other. Buttons on each side direct train forward or reverse. Includes circuit breaker to protect against current overloads. Red indicator light warns of "shorts." **$22.50**

**TYPE TW 175 WATT,
115 VOLTS, A.C., 60 CYCLES**

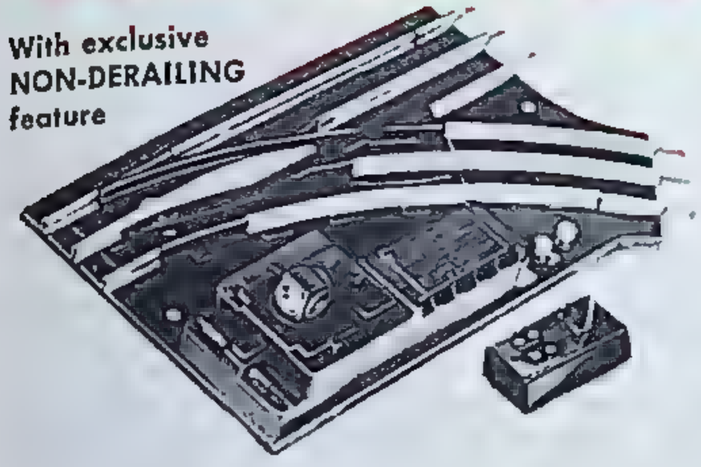
Power for operation of the train is completely isolated from accessory voltage, so that regardless of the number of accessories used, train will not be affected. Left hand throttle operates whistle and reverse. Has two built-in circuit breakers to guard against "shorts," one on each circuit, and a "power on" pilot light. Listed as "Standard" by Underwriters Laboratories. **$16.95**



**TYPE RW 110 WATT,
115 VOLTS, A.C., 60 CYCLES**

The RW will handle any "O" gauge train and a number of accessories. There are four fixed voltage combinations for operating accessories. Left button blows whistle. Right button controls train direction —forward or back. Has built-in circuit breaker to guard against over-loads. Red danger light warns against "shorts." Listed as "Standard" by Underwriters Laboratories. **$13.95**

LIONEL "027" Track



LIONEL No. 1122 REMOTE CONTROL SWITCHES

No. 1122 also has the famous non-derailing feature. When a train approaches the switch in a closed position, from any direction, the swivel rail snaps over to permit the train to run through. Controller box has red and green lights which correspond to lights on the switch box, telling you whether switch is open or closed. **Pair $13.95**
